Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Acknowledgement is made of applicant's amendment to the claims filed 9/06/02. In order to reduce the serious burden on the Office to search three (3) different inventions a restriction requirement is being made.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 17, 18, and 20 are, drawn to a jack accessory, classified in class 254, subclass 111.
- II. Claims 7-12, drawn to a socket, classified in class 254, subclass 134.
- III. Claims 13-16, 19, drawn to a tongue, classified in class 254, subclass 133R.

Inventions I and (II & III) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a rectangular tube, flange catch, flange, and support base. The socket and tongue subcombination has separate utility such as being useable with a tube not part of a lift device. The socket could be used as a support for a bracket for shelving. The tongue could be used as a bracket for shelving.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention socket and tongue each have separate utility such as set forth supra. See MPEP § 806.05(d).

Searching three (3) different inventions in this case would present a serious burden to the Office. The searches for the three (3) inventions are not coextensive. The search for the combination does not require searches in nonanalogous areas outside the jack art for the socket and tongue per se. However, searches for the socket and tongue per se would require searches in non-analogous areas unrelated to the jack art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Watson whose telephone number is 703 308-1747. The examiner can normally be reached on Mon. - Thurs. , 5:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail III can be reached on 703 308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
